QUALITY MADE BY EURA MOBIL

Set off and leave the worries of everyday life behind – your Eura Mobil will help you do exactly this in every conceivable way. With their functions and characteristics inspired by years of practical experience, our motor homes make travelling an endless delight. Whether it be the generous storage space, protection from the weather thanks to the GRP chassis, stability during winter and comfortable underfloor heating thanks to heated double floors, insurance benefits or generous warranties – we've thought of everything you could need to make your holiday worry-free.

EURA MOBIL BASICS

SET YOUR OWN STANDARD AND COMPARE YOURSELF!

ONLY AVAILABLE FROM EURA MOBIL:

X	Bonded and all-round sealed body composite made of hail-protected glass-fibre reinforced plastic (GRP) in Eura Mobil Sealed Structure technology Material composite from aeronautical engineering: high torsional stiffness, best bonding strength (3.5 t on 1 m profile length), seamless sealing against moisture penetration, the hail-protected surface material enables lower third-party, fire and theft premiums with many insurance companies than with comparable vehicles with aluminium sheeting
X	Heated and insulated double floor Frost-protected "basement", all technical installations are installed protected in the double floor instead of inside the vehicle or on the underbody
X	Additional storage compartments in the double floor with access from the interior Double floor offers additional storage possibilities for exterior storage compartments or floor compartments accessible from the inside

X	Winter-proof according to EN 1646-2 Rapid heating of the vehicle interior and guarantee of full functionality of the water system even in severe frost (test cycle with -15 degrees outside temperature)
X	Wood-free GRP walls with continuous insulation Rot-proof even in case of moisture penetration, easy to repair, efficient insulation without cold bridges in the wall
X	Robust furniture with aluminium profile reinforcements (3-year warranty) Torsion-resistant furniture with long service life and low noise development during travel
X	Wall units with sturdy metal uprights and noise damping Durable, quietly closing wall unit flaps and flap protection during travel
X	Lightweight GRP floor panel Weight reduction for more payload and floor panel resistant to moisture, road salt, dirt and operating materials
X	10-year leak-proof guarantee on the body (up to 150,000km) Eura Mobil represents high reliability and thus guarantees you a high degree of safety and risk protection against possible bodywork defects

X	Water tanks protected in the insulated and heated raised floor Water tanks are well protected against mechanical damage as well as possible frost-related functional restrictions
X	Underfloor heating effect in the floor you walk on Pleasant floor temperature – you can walk barefoot even in winter!
X	Beds with slatted frame and 7-zone cold foam mattresses Well-ventilated beds with comfortable mattresses for a relaxed night's sleep
X	Wide body door with window Easier access, more brightness, view of visitors outside the door
X	10-year leak-proof guarantee on the body (up to 150,000km) Eura Mobil represents high reliability and thus guarantees you a high degree of safety and risk protection against possible bodywork defects
X	Insulated frame window flush with the outer wall featuring a mosquito screen- Harmonious integration into the vehicle design, efficient insulation

X	Robust aluminium body sills Sturdy scuff plate against light collision damage
X	2 quick-acting drain valves for fresh water in the heated and insulated double floor Convenient water tank emptying from the inside
X	Electrically operated drain valve for waste water or manual drain cock (for coachbuilt models) in the heated area Simple and clean emptying of the waste water tank
X	Mini-Heki skylights Easy to open, durable skylights with multiple ventilation positions
X	Minimum 140-litre fresh water tank capacity Large fresh water capacity for more self-sufficiency from the external water supply
X	Pressurised water system Delay-free response of the water system, water pressure like at home

PRIORITY FOR THE FAMILY!

In the Activa One, the traditional strengths of Eura Mobil are aligned firmly with the needs of the family: generous storage space for luggage and toys in the double floor and rear garage, plenty of space for the whole family and sturdy furniture in the interior make the Activa One the first choice for campers of all ages. The long-lasting GRP bodywork also proves to be a real winner, forming the stable backbone for many carefree family holidays with a 10-year leak-proof guarantee.

Coachbuilds: insulated and heated

Bright modern furniture with a 3-year guarantee

Fold-out coachbuilt floor offers easy access to the driver's cab

Dinette in a wicker beach chair look with up to four seats with safety belts

Double floor 38 cm high with plenty of storage space

ACTIVA ONE

† Example floor plan: AOne 650 HS

EVERYONE HAS THEIR FAVOURITE SPOT ...

... could be the motto for the Activa One models. Whether it's in the seating group or in the large kitchen with lots of extra space in the cupboards, or in the children's room in the coachbuilt or the rear, or ...there are places throughout the vehicle that put everyone in a good mood. Simply beautiful to live in!

Robust upper cabinets with aluminium profiles and rattle protection feature

Children's room with pull-out bunk beds and a seating group

Large wardrobe

Kitchen with 142 l refrigerator, wide pull-outs and dishtowel bar

COACHBUILTS
ACTIVA ONE

←
Space where you need it.
Large room shower or
washroom with plenty
of space in front of the
washbasin? Both!

SIMPLICITY ITSELF TO USE ...

The bathroom with its swivelling wash basin combines fun and functionality. Turned to the side, you have full freedom of movement in the shower as well. The cabinet with shelves on the side is always accessible and the fan heating unit keeps the bathroom cosy and warm – just like at home!

DETAILS AND HIGHLIGHTS

There's good reason why the coachbuilds from Eura Mobil are always at the top of the rankings for Motorhome of the Year awards. Word has definitely gotten round about their reliable technology, practical room division concepts and high quality materials and workmanship. And yet, every Activa One also features numerous details yet to be discovered that set the series apart from the rest.

Drip catcher

A clever detail is hidden in the rotating water outlet of the kitchen tap. No more annoying dripping and wiping! The pressurised water system on board the Activa One ensures an almost instantaneous water supply, just like at home.

Coachbuilds

The insulated and heated coachbuilds offer you a perfect place to relax. The 160x210 cm bed rests upon a sturdy slatted frame and is well protected against cooling by efficient wall and ceiling insulation, the coachbuilt floor and a fan heating unit.

Flexibility makes the difference

You can decide on the spur of the moment whether you want to set up the rear of the A One 690 VB with a double bed on top and a single bed on the bottom, or the other way around, or with two single beds, or with two double beds – all of these options are possible, thanks to the pull-out slatted frame.

The swivelling table

The tabletop is equipped with an extension that swivels out, thereby ensuring that the whole family has plenty of room when they sit down for a meal together. Always there when you need it, but never in the way when you need to pass through.

Single beds in the coachbuilt

In the A One 650 HS you can enjoy a relaxing night's sleep on two 2m long single beds in the coachbuilt. But if you want, you can also make a large bed out of it by inserting an intermediate piece.

Cellar arithmetic

High double floor + individually adjustable storage area = space exactly where you need it. Made possible by storage area partitioning by your authorised dealer – precisely in line with your wishes. And because it's Eura Mobil, it's all frost-proof, of course, with an underfloor heating effect as well.

An edge for you

Another hidden, unassuming detail that makes all the difference: The robust aluminium panels ensure your Activa One will be able to handle kicked-up rocks or branches without suffering any body damage – which is good for your wallet and your nerves.

Round seating group without losing any storage space

The safety belts in the seating group of the HS models are fixed to the wall in aluminium profiles. This preserves the full storage space volume in the double floor.

Perfectly shaped

It's not just the Activa One's intrinsic values that impress, as the coachbuilt's dynamically curved front end and roof component are also beautifully designed. The hail-proof GRP surfaces and the way the roof shades the driver's cab make this exterior design very practical as well.

LOW-PROFILE
PROFILA T / RS

SPOTLIGHT ON TRAVEL COMFORT

In the semi-integrated models from Eura Mobil, the joy of travelling grows with each passing day. Well thought-out spatial ergonomics with optimum freedom of movement and open lines of sight form the basis for a high feel-good factor. In combination with the extensive comfort equipment and the high-quality choice of materials, you will enjoy your best time in stylish surroundings. Let us inspire you!

↓ Example floor plan: PT 720 QF

Large **panoramic roof window**

Wall units continuously in one line into the driver's cab

Two fold-out **single seats** with Isofix mounts

Table with foldable top

Large **face-to-face seating group** with two sofas up to 100 cm wide

LOW-PROFILE
PROFILA T / RS

↑ Example floor plan: PRS 720 QF

FOR THE WELL-RESTED

The current trend is for floor plans with lounge sofas facing each other, so-called face-to-face floor plans. In addition to the open spatial effect, these variants benefit from the particularly wide, comfortable sofas with additional belt seats that can be folded out for the journey if required. Eura Mobil is of course onto this trend, with the extra storage space in the double floor and garage, as well as the clever kitchen and bathroom design. The face-to-face seating groups show their strengths in the Profila RS especially, with its lift-up bed flush with the ceiling. In addition to the extra freedom of movement and seating comfort, there is also more light thanks to two large windows on both sides of the seating group.

Panoramic glass roof and Midi-Heki make for an extremely bright and airy atmosphere under the roof

Handy shelves right next to the lift-up bed

Double bed with 190 x 143 cm width

Comfortably low entry height for the lift-up bed

† Example floor plan: PRS 720 QF

WHAT A KITCHEN ...

... That's the first thing you'll say when you see the ergonomically curved kitchen centre in the EF floor plans. The carefully detailed workmanship that's so apparent in the spice rack and the illuminated high-gloss splash guard is combined with design highlights like the retractable tap under the foldable worktop extension, which can also be used as a dish draining board.

**Practical
spice rack**

**Hinged cover and
retractable tap**

Room-divider doors to separate the kitchen and
the bathroom and the bathroom and the bedroom

Ergonomically curved kitchen unit front with a mineral
work surface and an integrated sink ("cast in one piece")

WANT TO BET THAT ...

... you'll start dreaming in Profila beds? Wide, cold foam mattresses on stable, ventilated slatted frames with adjustable headboards are the comfortable basis for a relaxed night's sleep. For even more comfort, we have positioned reading lights, USB ports and wardrobe within easy reach. The bed height can also be varied on the centrally arranged double bed in the QF versions. The layouts up to 7 m impress with a compact washroom with integrated shower cubicle and swivelling washbasin – so there is always plenty of room to move even in a compact space.

↑ Example floor plan: PT/PRS 720 QF

↓ Example floor plan: PT 660 EB

DETAILS AND HIGHLIGHTS

Many details, one concept. Everyone will find their own personal highlights in the individual floor plans of the Profila series. What they all have in common is their distinctive functionality in a stylish, premium setting.

Easy access

The large storage compartments in the 730 EF are designed to allow you easy access to contents from the inside – and it's just as easy to load from the outside!

Variable garage

The height-adjustable bed in the QF models ensures you'll have enough space to transport bicycles if you like.

Spatial transformation

The room-divider doors that separate the kitchen and bathroom, and the two sliding doors between the bathroom and bedroom, allow you to transform the bathroom into a dressing room in the wink of an eye.

A clear symbol of quality

A sturdy GRP roof compartment on the Profila RS for the lift-up bed instead of a simple flip-up wall with a curved standard roof.

Couldn't be any easier

The sofas in the EF and QF floor plans can be transformed into single seats in the direction of travel – with Isofix mounts – in no time.

Extra bedroom

The 730 EF plays a special role in the model range. With its low single beds and a bathroom that extends across the entire width of the vehicle, this floor plan features two accessible rooms at the rear.

For tall people

The single bed variants EB / EF have large garages and comfortable beds with bed lengths of up to 196 cm. There is a wardrobe underneath and a linen compartment under the second bed.

Extremely easy to operate

The push of a button is all it takes to empty the waste water tank conveniently from the garage. No more dirty hands, no more bending over – this is what comfort is all about.

Wall unit with profile

The wall units from Eura Mobil are fitted with reinforcing aluminium profiles for maximum stability. A rubber lip is incorporated into the profile to prevent rattling noises while driving or loud closing noises.

LOW-PROFILE
PROFILA T MERCEDES

NEW

A TRUE DELIGHT

The new Profila T on the Mercedes Benz promises holiday enjoyment in its purest form. With great attention to detail, we have now brought our best-selling series to the highest level of perfection in the exclusive combination with the Mercedes Sprinter chassis. The elegant and dynamic exterior design is only the emotional expression of this model series – Evolution – which is already visible at first glance.

Flat roof connection for a dynamic design and efficient flow characteristics

Opening panoramic roof window above the driver's cab

Precisely adapted roof cut-out with maximum headroom

Smooth transition from the living area into the driver's cab

Driver's cab with modern safety and assistance systems

LOW-PROFILE
PROFILA T MERCEDES

TRUE RELAXATION

The very practical advantages of the new Profila top models are worth seeing or enjoying: with AL-KO low-frame, Alde hot water heating and a raised double floor of 19.5 cm, the new additions already have luxury-class attributes as their standard features. The new sunroof, available exclusively in the new models, brings even more fresh air into the driver's cab.

PURE TRAVEL PLEASURE

In both compact models 676 EB and 696 EB, the kitchens will surprise you with an unusually large amount of worktop space, large refrigerators and spacious base units with sturdy kitchen pull-outs complete with soft-stop stops. The bathroom is also impressive, with a high degree of variability and great freedom of movement thanks to the swivelling washbasin. The 726 EF and 726 QF models have even more free space in their bathrooms and are perfect as a separate dressing room.

"Chalet" interior with the wild oak look and chrome elements

Unobstructed lines of sight for a generous feeling of space

Wall units with aluminium profile reinforcement and rattle protection

Dimmable ambient lighting

Basement and underfloor heating in one: Heated double floor

LOW-PROFILE
PROFILA T MERCEDES

AN OASIS OF CALM

You can relax in the comfortable beds of up to 2.03 m. Underneath, the spacious garage and the large wardrobes provide further reasons for handling even larger luggage with confidence.

DETAILS AND HIGHLIGHTS

The new Profila T on Mercedes are in a class of their own. With Al-Ko low-frame, Alde hot water heating and opening panoramic roof window plus exclusive Mercedes chassis, the result is an almost perfect combination.

A lightweight in its class

Thanks to the Al-Ko low frame and consistent lightweight construction, the Profila T on Mercedes has practical payload values.

Always handy

There is plenty of additional storage space in the floor hatches and storage compartments of the double floor that can be reached from the inside in a single action.

Extremely easy to operate

The push of a button is all it takes to empty the waste water tank conveniently from the garage. No more dirty hands, no more bending over – this is what comfort is all about.

Inviting

There's plenty of room for bulky luggage or bicycles in the lowered rear garage located underneath the beds.

New star era

The modern driver's cab of the Mercedes Sprinter with innovative safety and assistance systems conveys relaxed travel comfort.

For fresh air lovers

The new, opening panoramic roof window (optional) guarantees plenty of light and air in the driver's cab. In combination with a tilting roof window over the seating group, it creates the ultimate fresh air oasis on warm days.

Ingenious wardrobe

An internally illuminated wardrobe and a linen cupboard under the folding slatted frames create plenty of space – and not just for your leisure clothes.

Comfort zone

With the Alde hot water heating system, you gain heating comfort just like at home – completely draught-free and with constant heat output.

Quick loading hatch

The exterior storage compartment integrated into the body at a convenient loading height can be used for frequently used parking spot utensils in the models from 696 EB.

LOW-PROFILE
CONTURA

LIVING LIKE THE STARS

Relaxed travel and relaxation in a five-star ambience – that is what characterises a holiday in the Contura. The effectively illuminated Contura Lounge with its chrome-finished, high-gloss furniture, elegant upholstery with decorative stitching and stylish accessories is a great place to switch off. You are virtually transported from earth when looking through the Starlight Dome panoramic roof, which opens up a completely new view of the starry sky with 20% more surface area than a tilt-up roof.

Fine furniture in high-gloss look including display cabinet in the kitchen

Vibrant, contrasting **precious wood atmosphere**

Perfectly dimensioned roof cut-out for maximum headroom

Super-comfortable **face to face seating group** with folding table

Stylish upholstery with fine decorative stitching

Heated floor surface with storage compartments

LOW-PROFILE
CONTURA

ENTIRELY TO YOUR TASTE

Star-quality cuisine under a starry sky awaits you in the kitchen centre with its ergonomically curved front. Fine details such as the indirectly illuminated pull-outs, the mineral worktop, the large refrigerator (optionally in combination with oven) and the display cabinet for the espresso machine emphasise the exclusive character of the interior in this area as well. You can find even more luxury in the rear: the countertop washbasin, rain shower and backlit reed grass inlay ennoble the bathroom with slate-look walls into an illustrious wellness area.

DETAILS AND HIGHLIGHTS

Storage compartment wall units

The compartments under the wall units with indirect lighting are the perfect shelves for books, smartphones and other small items

At your service

The central technology compartment brings together the water outlet tap and other technical connection equipment in a unit in the side wall that can be easily accessed via a storage flap.

Starlight dome panoramic roof

20% larger surface area than a tilting roof window and 100% inspiration – thanks to the smart-lift and soft-close functions and a guaranteed box seat under a starlit sky. Simply lift with two fingers instead of cranking! In combination with the panorama glass in the hood, this guarantees a bright living space.

Driver's cab

The railing around the roof cut-out is precision-fitted and elegantly designed for maximum headroom. The integrated reading lights are elegantly fitted.

Keeping things clean

The push of a button is all it takes to empty the waste water tank with the help of an electric drain valve – an on-board camera guides the driver to a position directly above the drain in the parking spot (optional).

Rear design

A three-dimensionally shaped rear wall made of one "cast", including direction-indicating LED running light indicators, shows the class of the Contura from afar.

Attention to detail

Elaborately crafted upholstery and back cushions with decorative stitching give the living room its distinctive look together with the fine furniture.

Finely made

The high-gloss surfaces of the cabinet flaps form an exclusive arrangement with the chrome applications.

Feeling at home

... not least because of the draught-free and constant heat comfort of the hot water heating system. With the convectors in the raised floor, it also provides comfortably warm under-floor heating.

Safety on a new level

Thanks to the MB Sprinter's modern safety and assistance systems, you are always calm and at the same time safe and dynamic on the road.

A-CLASS
INTEGRA LINE

UNMISTAKABLE TRAVEL IMPRESSIONS

The Integra Line already shows from the outside the premium claim of Eura Mobil in the integrated models. However, the elaborately designed GRP front with the LED double lights (optional) and the striking radiator grille doesn't stop at visual design attributes – the large panoramic windscreen with short front overhang also ensures the best possible view and thus driving safety in abundance.

Large **panoramic windscreen** that provides for an optimal view of the road and lets in lots of light

Spacious **lounge seating group** for up to 7 people

Sofa with up to 1.60 m width and two fold-out single seats

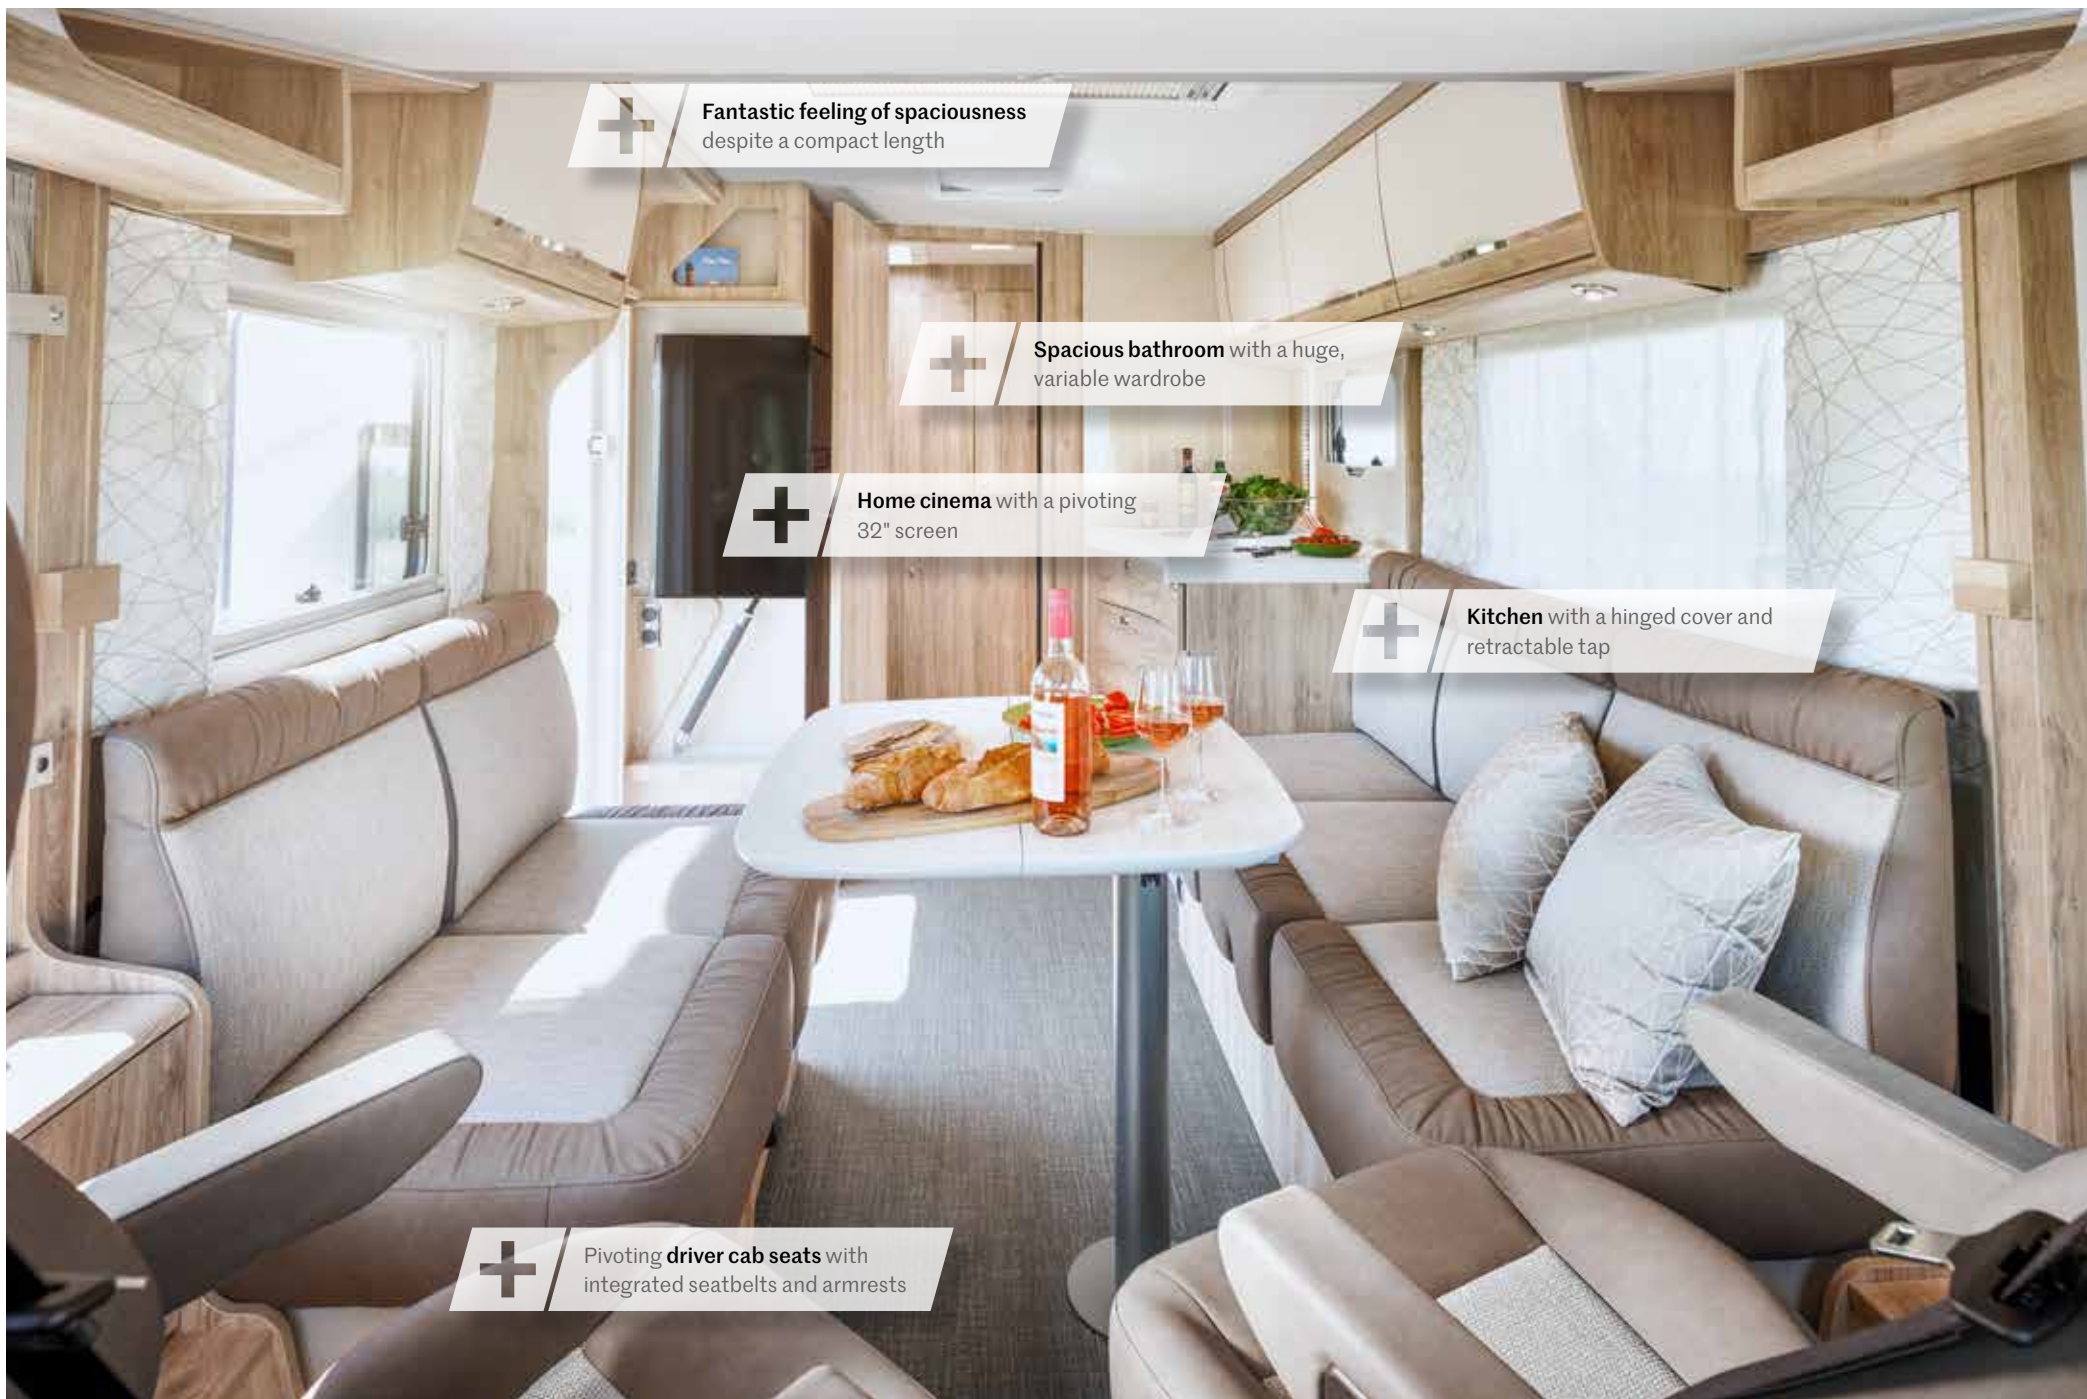

A-CLASS
INTEGRA LINE

Example floor plan: IL 695 LF 1

SPACE FOR DREAMING

In the living room, the fantastic spatial effect is inspirational. Even with the compact layouts of the 7 m class, the Integra Line provides a lot of light and plenty of headroom thanks to the all-round panoramic glazing and the lift-up bed that lies close to the ceiling.

Fantastic feeling of spaciousness
despite a compact length

Spacious bathroom with a huge,
variable wardrobe

Home cinema with a pivoting
32" screen

Kitchen with a hinged cover and
retractable tap

Pivoting driver cab seats with
integrated seatbelts and armrests

A-CLASS
INTEGRA LINE

FANTASTICALLY SPACIOUS

When looking into the rear area, the separate bathroom and sleeping areas in particular catch the eye with their diverse possibilities for use. Whether as a dressing room, a "pure" shower compartment or a bedroom separated by a sliding door – travellers are always discreetly sealed off without restricting their ability to go about their everyday lives in other areas.

Backlit shower column
with rain shower

Room divider doors right and left
for vehicles with bathroom

Surface-mounted wash bowl with
high-quality fittings

Warm air diffuser for pleasant
bathroom temperature control

OPEN TO NEW WORLDS OF ENJOYMENT

The kitchen is bright and open – always with plenty of room to move thanks to the curved kitchen front, with a tall refrigerator and large pull-outs.

DETAILS AND HIGHLIGHTS

The strengths of the Integra Line are only very incompletely described with the great spatial comfort. The individual models offer even more highlights, especially in the stylish and modern GRP shell.

"Cast in one piece"...

... is how one could describe the GRP front mask, not just in terms of the visual impression it makes but also with regard to its construction design – with a perfect fit and superlative stability that help ensure a high degree of chassis torsion resistance.

Short cabin principle

The short cab overhang with steeply sloping front and short dashboard behind a large panoramic windscreen provides an excellent view of the road. The blind spot in the field of vision in front of the vehicle is minimised.

Safety first

The optional LED main headlights with static cornering lights give the IL a distinctive look – and also optimally illuminate the road ahead at night.

Painstakingly crafted details

A satin-finished aluminium grip plate and surface quality you can see and feel on the instrument panel are just two examples of the outstanding high quality materials and workmanship that define the Integra Line.

Practical box

On the passenger side in the driver's cab is a practical storage box for travel literature, chargers or other small items at hand. Naturally featuring Eura Mobil's typically stylish and stable characteristics in oak chalet finish.

Rear garage

There's plenty of room for bulky luggage or bicycles in the lowered rear garage located underneath the wardrobe.

Direct access

You can also directly access the garage from the interior. This can be very practical when you need to hang wet clothes up to dry in the bathroom, since you don't have to carry them all the way through the vehicle (IL 695 LF).

Extremely easy to operate

The push of a button is all it takes to empty the waste water tank conveniently from the garage. No more dirty hands, no more bending over – this is what comfort is all about.

Cinematic experience

The 32" screen can be easily swung out from its wall mount in the entrance area, with a perfect view from all seats. (IL 695 LF)

A-CLASS
INTEGRA

YOU CERTAINLY LEAD THE WAY ...

... when you travel with the Integra. Thanks to LED headlights and a short dashboard in front of the panoramic window, the luxury integrated vehicle from Eura Mobil not only allows you to keep a relaxed overview of the road ahead at all times, but also to keep an eye on everything to the rear thanks to the reversing camera and wide-angle mirrors. The LED tail lights with directional running light indicators also ensure that you are seen at your best.

Lounge seating group with pull-out TV on the passenger side

Thrilling spaciousness and additional storage space with optional storage cabinets (in place of the lift-up bed)

Pilot's seats with lumbar supports

Large table with a divided table top that allows for easy passage through the room (I 760 EF/QF)

FREE SPACE FOR CREATIVE KITCHEN IDEAS

The ergonomically curved kitchen block with surface-mounted hob, oven, coffee maker lift and indirectly illuminated spice rack uses a combination of materials in its high-gloss cabinet fronts and silk-matt mineral work surfaces to create a particular allure.

Luxurious living space
for up to 7 people

Spacious gourmet centre with glass cabinet,
display case for the coffee machine and spice rack

Table with chromed double
table pedestal (I 890 EB/QB)

**Comfort seats with lumbar
support** and seat heating (option)

A-CLASS
INTEGRA

PROPERTY WITH PASSION

Two large single beds (2.0 metres and 1.95 metres in length) situated above a large rear garage, plus additional storage space in the rear cabinets – these are the outstanding practical features offered by the EB variants. The magical atmosphere created by the indirectly illuminated rear wall with chrome plating, as well as ceiling struts that are also illuminated, is certainly one of the major selling points of this fantastic model.

←
The Integra 760 QF/890 QB offers a certain quantum of extra comfort with its 1.50 m wide, adjustable central bed with a headboard that can be raised. With a linen compartment at the foot of the bed, plus two wardrobes and two corner cabinets, this floor plan also offers a number of easily accessible storage possibilities in the rear.

A-CLASS
INTEGRA

STYLISHLY FINISHED ...

... is what you'll think when you see the bathroom and kitchen with their sophisticated ambient lighting, high-quality mineral surfaces and shiny furniture fronts with chrome inserts and top-class detailed solutions. In the bathroom, the backlit shower wall with reed grass inlays and the washroom wall panelling in a slate look exude a noble character all of their own.

DETAILS AND HIGHLIGHTS

Luxury as it manifests itself in the Integra is both stylish and discreet. Here, there's no desire to be conspicuous at all costs – there's only elegant design and functional perfection for you to enjoy.

A shining example

LED headlights make a thrilling impression by creating a daylight-like atmosphere as they illuminate the road ahead. The static cornering lights provide support here in turns and curves.

Nice and easy

All you need to do is push a button to lower the electrically controlled lift-up bed (which can be reached easily via the seats) to a comfortable entry height.

At your service

The central technology compartment brings together the water outlet tap and other technical connection equipment in a unit in the side wall that can be easily accessed via a storage flap.

Keeping things in order

The organisation system in the garage features storage boxes that can be mounted on the walls in a variable arrangement, thereby ensuring that everything will be put away neatly – and found again when it's needed.

Double-coated... makes for better insulation

The side windows in the driver's cab are double-glazed and the wind-screen is fitted with blinds that protect against glare and offer additional insulation (*optional*).

Keeping things clean

The push of a button is all it takes to empty the waste water tank with the help of an electric drain valve – an on-board camera guides the driver to a position directly above the drain in the parking spot (*optional*).

Great view from the rear

The back of the Integra is a sight to see as well: The single-piece three-dimensionally curved GRP rear wall speaks to a high degree of expertise – and a highly professional design.

Cargo capacity in line with your needs

The Integra 760 is available in an AL-KO two-axle or three-axle version. Those who are looking for easier handling should go with the two-axle configuration – but if you need to transport a lot of cargo, you should opt for the three-axle version.

All of the information in this brochure relates to the products listed herein and does not apply to any other products of Eura Mobil GmbH. The models illustrated in this brochure show the features available in Germany. They may also contain special features and accessories that are not included with the standard scope of delivery. All weights quoted are values with a fluctuation limit of +/- 5 per cent.

Due to legal regulations, differences from the model variations described here and equipment featured may be necessary in certain countries. Please ask your Eura Mobil dealer about the exact scope and range available of model-specific and model-neutral features. Subject to errors and changes in design, equipment and special features. The publication of this brochure renders all previous catalogues invalid.

General information regarding the weight situation in motor homes

Special features (additional features) increase the weight in the vehicle's ready-to-drive state and reduce the cargo capacity. The weight of the additional equipment is detailed in our brochure information or your dealer / seller can tell you. The maximum number of persons permitted depends on the weight and axle load. It can be reduced if special features (= special equipment / additional equipment) and accessories are installed, so in the interests of cargo loading capacity certain seats cannot be used. If all seats are to be used, the cargo capacity may need to be reduced. The technically permissible overall weight and axle loads must not be exceeded. The cargo loading capacity reduces with the installation of special features

(= special equipment / additional equipment) and accessories. The cargo loading capacity is also not only dependent on the weight in the vehicle's ready-to-drive state, the actual vehicle weight, the weight of the accessories and the technical permissible overall weight, but also on the respective axle loads. The only way to achieve the highest possible payload supported by the vehicle's technology is to have a corresponding, axle-load-dependent load distribution.

Unless otherwise regulated, weight in ready-to-drive state as per Article 2 (4a) Regulation (EU) 1230/2012 is defined as: Vehicle dimensions with standard features according to manufacturer specifications (incl. vehicle tool kit) + fuel tank 90% filled

- + 75 kg (weight of the driver)
- + fluid gas bottle (filling capacity of 11 kg) made of aluminium filled to 100 % (equals 18 kg in total)
- + Fresh water tank filled to 100% in drive position (capacity of the fresh water tank is limited to 25 litres of fresh water in ready-to-drive state, where technically feasible*)
- + fresh water heater filled to 100% = dimensions in ready-to-drive state

* marked capacity of the fresh water tank pursuant to appendix V. Part A (2.6 Fn). (h) Regulation (EU) 1230/2012 is limited according to vehicle model to 25 litres by an overflow valve (recommended filling for driving)

The technically permissible overall weight according to Article 2 (7) Regulation (EU) 1230/2012 is defined as: The vehicle's maximum weight when loaded as provided by the manufacturer.

Pursuant to the information provided in the catalogue, the maximum cargo loading capacity is defined as: Technically permissible overall weight - weight in ready-to-drive state = maximum cargo loading capacity.
