THE PRIME TIME VAN

VISIBLY DIFFERENT

In the new Premium van from Eura Mobil, the exclusive ambience transforms every moment into a special moment. Feel the fine materials and experience the individual details that make the Eura Mobil van your very own mobile home. Take your time and let the interior work its magic on you ...

Skylight trims made of soft eco-leather including LED lighting

Interior-lit wall units with shelves and ambient light

Easy-care and high-quality **fabric / eco-leather upholstery** combination

Washroom with 30mm thick door including handle in eco-leather

Table with folding top, cup holder and swivel extension

TANGIBLY DIFFERENT

"Cosy" is our customers' favourite term for the ambience in the Eura Mobil Van. Selected upholstery fabrics, a fleecy ceiling covering and textile wall coverings with eco-leather appliqués instead of bare plastic surfaces make the tangible difference. Feel it for yourself....

Fleecy "Smooth Touch" **ceiling covering** with LED ambient light on wall units

Rear storage lockers all around, on the sides with storage and LED reading spotlights with USB ports

Textile **microfibre wall covering** with prefixed, back-lit window shades made of eco-leather

Body-flush, insulated **windows** with mosquito screen

Comfort cold foam mattresses with split and therefore foldable bed frame

REFRESHINGLY DIFFERENT

In addition to the obvious differences, the Eura Mobil van can also impress with its hidden qualities. At the slightest touch of a hand, the washbasin and mirror cabinet swivel around together with the wall to reveal a "shower cubicle" with a comfortable floor space of 60x90cm. The retractable tap in the kitchen is just as cool. Discover the hidden possibilities ...

Storage compartments
even on the ceiling

Large washbasin
made from mineral material

Numerous shelves and shower fittings integrated in the wall

Swivel shower wall

Shower tray 60 x 90cm for plenty of freedom of movement

EXCELLENT PRACTICALITY

Is "compact" a negative or positive term these days? It's what you make of it that counts, our designers thought ... and in the kitchen they show in exemplary fashion what counts: wide pull-outs with soft-stop retraction, the high-quality mineral worktop with integrated sink, "all from a single piece", and the outside storage compartment plus table anchorage for breakfast outdoors are just a few facets of this enjoyable kitchen centre. Try it out ...

+ Retractable water tap

+ Elegant spice rack with indirect lighting

+ Worktop made of one-piece moulded mineral material with integrated sink and foldable extension

+ Side storage compartments in the entrance area, including with bottle holder

+ Extra-wide, sturdy metal pull-outs with soft-stop retraction

Rear ventilation to prevent condensation from accumulating in the wall units

Elegant, transitionless corner connection with textile cover and integrated **loudspeaker**

High-quality **bi-colour wall unit flaps** with chrome-plated inlays and handle button lock

Shelf with integrated light strip for **LED ambient light**

Reading spotlights with **USB ports**

CARE IN THE DETAIL

The Eura Mobil vans have nothing to hide in the corners either. Precisely fitting moulded parts, a high-quality look and clever details characterise the interior fittings. No matter whether it is a matter of such elementary things as a powerful energy supply with the lithium-ion battery or such seemingly unimportant little things as upholstery seams: the functionality, installation location and choice of materials of the individual components have been selected with care. Compare ...

DETAILS AND HIGHLIGHTS

Storage compartments in the double floor

Optimum use of storage space: 3 storage compartments are installed in the seating group area alone: 1 pull-out, 1 folding compartment on the seat base and 1 floor storage compartment with handle eyelet

Water shut-off valves

Convenient operation: the drain valves for the water tanks are easily accessible and mounted in the heated and insulated interior floor. The gas shut-off taps are installed within easy reach in the kitchen unit.

Disc springs

First-class sleeping comfort: the mattresses are well ventilated on comfortable disc springs (V 595 HB) or slatted frames. The bed frames are divided and foldable, allowing variable use of the rear compartment.

Wall units

shapely and functional: the wall units impress with an elegant design. Solid metal spring uprights, chrome-plated handle buttons and contact-controlled interior lighting embody Eura Mobil's highly functional approach.

Table rail

Outdoor enjoyment: the table from the interior can also be hung on the outside rail on the kitchen unit for breakfast outdoors. Fine detail: for the rest of the day, the rail hides invisibly behind a hinged cover.

Panorama roof window

Close to the sky: the (optional) panoramic roof in the cab floods the interior with light. An interior frame with textile covering harmoniously blends the window into the interior.

Lithium-ion battery

Powerful self-sufficiency: the 100 Ah lithium-ion battery equipped with a charge booster has plenty of reserves. A real highlight included in even the standard scope of delivery!

TV cabling and USB ports

Thoughtful: two USB charging ports are installed at the top of the seating group in addition to the TV preparation. So you can conveniently charge your smartphones on the shelves under the wall units without the cables getting in the way.

Upholstery seam

The eye travels with you: the upholstery seams in a chic cross-stitch pattern are exemplary of the lovingly created design. The other textile finishes also create a harmonious and homely ambience.

Cup holder

Great functionality in miniature: the table insert with cup holder is a practical detail for travelling. And if anything ever spills, both the high-gloss table surface and the eco-leather window shade can be quickly cleaned.

BEDS

Double bed, lateral installation, foldable slatted frame for storage space expansion

Single beds installed longitudinally, foldable slatted frame for storage space expansion, 2 modular storage boxes, removable

Double bed, electrically height adjustable, storage space floor made from sheet steel with access ramp for bicycles

Floor plan: V 595 HB †

The classic layout for compact vans up to 6 m in length impresses on the V 595 HB with a comfortable folding double bed equipped with disc springs and cold foam mattress, including swivelling LED reading spotlights with USB ports on the upholstered headboard.

↑ Floor plan: V 635 EB

Relaxing sleeping comfort on the single beds measuring up to 1.95 m in length and a high degree of storage space variability are the striking individual strengths of the V 635 EB. The storage boxes in the rear, which can be removed in no time at all with a toggle lock, allow extremely flexible use of the rear storage space.

Floor plan: V 635 HB †

If you like, the heavy-duty truck in the range - or maybe the sleeper car after all? The bed with its comfortable lying surface can be conveniently raised at the push of a button, revealing a loading space of 1800 x 1200 mm x 1300 mm (LxWxH) – one that even fits many motorbikes.

All of the information in this brochure relates to the products listed herein and does not apply to any other products of Eura Mobil GmbH. The models illustrated in this brochure show the features available in Germany. They may also contain special features and accessories that are not included with the standard scope of delivery. All weights quoted are values with a fluctuation limit of +/- 5 per cent. Due to legal regulations, differences from the model variations described here and equipment featured may be necessary in certain countries. Please ask your Eura Mobil dealer about the exact scope and range available of model-specific and model-neutral features. Subject to errors and changes in design, equipment and special features. The publication of this brochure renders all previous catalogues invalid.

General information regarding the weight situation in motor homes

Special features (additional features) increase the weight in the vehicle's ready-to-drive state and reduce the cargo capacity. The weight of the additional equipment is detailed in our brochure information or your dealer / seller can tell you. The maximum number of persons permitted depends on the weight and axle load. It can be reduced if special features (= special equipment / additional equipment) and accessories are installed, so in the interests of cargo loading capacity certain seats cannot be used. If all seats are to be used, some cargo capacity may need to be foregone. The technically permissible overall weight and axle loads must not be exceeded.

The cargo loading capacity reduces with the installation of special features (= special equipment / additional equipment) and accessories. The cargo loading capacity is also not only dependent on the weight in the vehicle's ready-to-drive state, the actual vehicle weight, the weight of the accessories and the technical permissible overall weight, but also on the respective axle loads. The only way to achieve the highest possible payload supported by the vehicle's technology is to have a corresponding, axle-load-dependent load distribution.

Unless otherwise regulated, weight in ready-to-drive state as per Article 2 (4a) Regulation (EU) 1230/2012 is defined as:

- Vehicle dimensions with standard features according to manufacturer specifications (incl. vehicle tool kit) + fuel tank 90% filled
- + 75 kg (weight of the driver)
- + fluid gas bottle (filling capacity of 11 kg) made of aluminium filled to 100% (equals 18 kg in total)
- + Fresh water tank filled to 100% in drive position (capacity of the fresh water tank is limited to 20 litres of fresh water in ready-to-drive state, where technically feasible*)
- + fresh water heater filled to 100% = dimensions in ready-to-drive state

* marked capacity of the fresh water tank pursuant to appendix V, Part A (2.6 Fn). (h) Regulation (EU) 1230/2012 is limited to 20 litres by an overflow valve (recommended filling for driving), depending on the vehicle model

The technically permissible overall weight according to Article 2 (7) Regulation (EU) 1230/2012 is defined as: The vehicle's maximum weight when loaded as provided by the manufacturer.

Pursuant to the information provided in the catalogue, the maximum cargo loading capacity is defined as: Technically permissible overall weight - weight in ready-to-drive state = maximum cargo loading capacity.
